The first web page looked like:

World Wide Web

The WorldWideWeb (W3) is a wide-area hypermedia information retrieval initiative aiming to give universal access to a large universe of documents.

Everything there is online about W3 is linked directly or indirectly to this document, including an executive summary of the project, Mailing lists , Policy , November's W3 news , Frequently Asked Questions .

What's out there?
>   Pointers to the world's online information, subjects , W3 servers, etc.
Help
>   on the browser you are using
Software Products
>   A list of W3 project components and their current state. (e.g. Line Mode ,X11 Viola , NeXTStep , Servers , Tools , Mail robot , Library)
Technical
>   Details of protocols, formats, program internals etc
Bibliography
>   Paper documentation on W3 and references.
People
>   A list of some people involved in the project.
History
>   A summary of the history of the project.
How can I help ?
>   If you would like to support the web..
Getting code
>   Getting the code by anonymous FTP , etc.
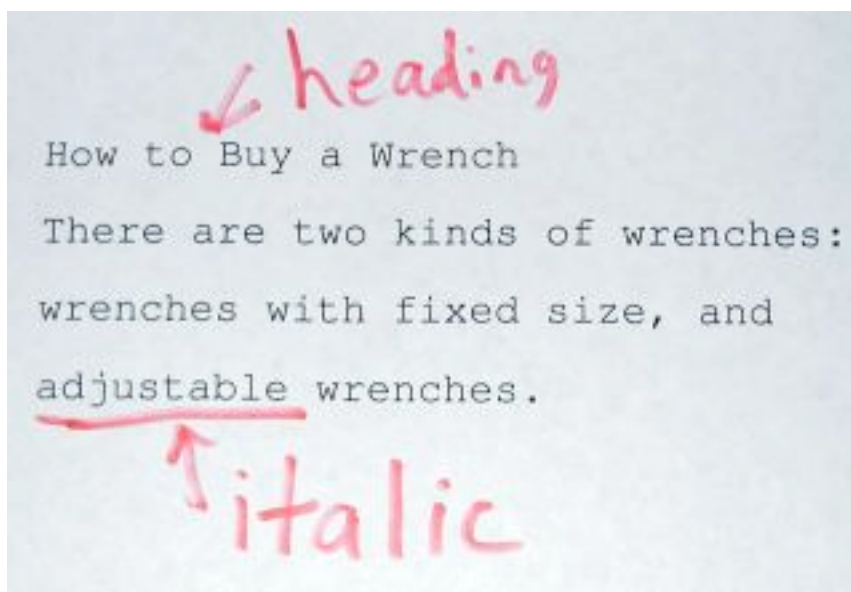

It was made by this guy:

Tim Berners-Lee

"Creating the web was really an act of desperation,
because the situation without it was very difficult"

8. Write a story that you (occasionally) helped someone

★★★

Before a week, when I was walking down the street I saw a old woman fell down. I ran to help her. When everyone saw her was laughing only at me and one friend went to help her.

We were so confused and my friend went to call the ambulance.

When the ambulance came the doctors got her and us and we went to the hospital.

It was nothing, and the doctors said that we must be anxious But we were very satisfied because we helped an old person. But we were also satisfied because the other people were laughing at her

In the future I believe that everyone must offer his help and they will help any man not only old men, who have a problem but also every human.
